

Helpful site for audio pronunciations of words is www.m-w.com, the Merriam-Webster web site.

Do NOT have your CAT software open at the same time you are using DJ.

Make sure your CAT system is set to FLAG CONFLICTS.

6. When you reach the end of the file, click on Save. At the main menu, highlight the submodule then click on Make RTF. Save the new RTF dictionary where you will be able to find it, e.g., My Documents or a special folder you create for all of your DJ RTF files. The file will be saved as an RTF file. You will have to select this file type to locate it in your CAT system for import purposes.
7. Import this .RTF into your CAT system as a NEW DICTIONARY. Edit this thoroughly BEFORE merging it into your main dictionary.

Writer Setup

On the right side of the DJ screen, choose your writer and the port to which it is connected. This writer setup will be identical in your CAT software. Please put in a couple of strokes before initializing your writer. Always start with a clear RAM. When the new Adjust Writer Box opens, put strokes on your writer. When you have the correct COM port selected, your steno will appear in the Adjust Writer Box.

Diamante & Wave Writers: In the writer, choose Setup, More, Options, USB Communication. Change from Standard to Mira Emulation. This setting is fine in your Case Catalyst. In DJ, select Stenograph USB.

e'lan Cybra, e'lan Mira, Fusion & Protégé: In DJ Select Stenograph USB. If you are not connected via USB, select the Stentura 8000 as your writer and then select the correct COM port.

Gemini Writers: Select Transcriptor X.

Lightspeed Writers: Select Transcriptor X and choose Baron in the Lightspeed software.

If you have any questions, please contact us at 517-410-2209. We are happy to help!

1. Click on the Dictionary Jumpstart desktop icon.
2. Writer Setup: Please refer to the back page.
3. **Start with a clear RAM each time on your writer.**
4. **Put a couple of strokes on your writer.** Highlight the demo, then click Build.
4. In the DJ Build Dictionary screen, you will provide the steno entry for each word in the Word Box. Steno commands are listed to the right and you may customize these by clicking on the buttons on the right side. The default steno setting /*FPLT moves to the next new word or allows you to skip a word, /*RBGS if you have an alternate way to stroke this word and the asterisk deletes previous strokes. You may edit the English word in the Word Box if desired (e.g. to capitalize a word).
5. If you wish to use the Suggest Feature, you must first click on Configure and enter one or two letters that you consistently shadow or drop. We recommend using two letters at the most for each option. Then click OK. After stroking a word, you may click on Suggest for suggested outlines based on what you've written. Follow on the on-screen instructions. After you've selected the words, it will confirm how many words have been entered.

Instructions for using Dictionary Jumpstart 7.0

PLEASE READ ALL INSTRUCTIONS IN THEIR ENTIRETY BEFORE USING.

DEMO INSTRUCTIONS

Double click the DJ icon on your desktop to begin.

Writer setup instructions are on the back page.
